

M Y S T I K <sup>®</sup> P L O W C O A T

Date 01/10

**DESCRIPTION:**

Mystik Plowcoat is an effective, seasonal protective coating, especially for farm equipment during the off-season. It leaves a very durable film that protects the metal from the harsh weather elements. Mystik Plowcoat is easily applied and removed.

**FEATURES:**

- An economical method for protecting valuable farm equipment
- Easy to apply; average coverage 3/4 gallon/100 square feet
- Suitable for brush, spray, or dip application
- Dries to a thin, glossy brown, protective film
- Formulated primarily as a protective coating for metal agricultural implements, tools, and equipment during off-season storage
- Easily removed with ordinary solvents like paint thinner or mineral spirits at the beginning of the new season

**TYPICAL PROPERTIES:****MYSTIK<sup>®</sup> PLOWCOAT**

<b>Material Code</b>	<b>663661002</b>
Bulk Appearance	Very Thin Black Fluid
Specific Gravity, ASTM D 4052, at 60° F	0.917
Density, lb/gal at 60° F	7.63
Composition, wt. %	
Volatile	30
Non-Volatile	61.5
Flash Point, ASTM D 92, COC, °F	150
Dry Film Appearance	Thin Brown Asphaltic Film
